COOKER HOODS

BUILT IN OVENS

Aisen Electric Co.,LTD. is a manufacturer of electrical household appliances, has been in the field of air re-circulation , ventilation and built in oven for over ten years, combining Technology, Quality and Service. The company's manufacturing facilities and sales operations are located at Wuyi City of Zhejiang Province.

With a concept of "the use of superior and innovative material, superb professionalism, and employment of electric control systems that guarantee dependability and extended product life.", Aisen Electric designs and manufactures European style cooker hoods, built in ovens of the finest quality. Recognized in the Chinese domestic market as a leader of innovation, We are specialized in OEM & ODM towards international markets, Aisen Electric products are present on more than 30 foreign markets.

Service hinges on providing customer assistance with uninterrupted continuity, all the way through the post-sales phase. This is bolstered by exacting attention to the needs of a clientele that is increasingly informed and demanding, as well as by fast, effective response to their changing needs. Vented hoods and built in ovens will no longer be a small kitchen accessory, but, rather, an important element in kitchen furnishings. This is the spirit that animates us-one that our customers appreciate immediately.

Our export department are ready to work with you, our valued customer ,to develop even better products to enhance the modern kitchens and the lifestyle of our end-users throughout the world.

COOKING PROFI

voltage:110V ~ 240V/50Hz/60Hz
motor power:175W
lamp:2x20W halogen lights
filter: 2pcs baffle filters
suction capacity:1000m³/hr
outlet diameter:150mm
gw/nw.:30/26kg
packing:960mmX450mmX660mm
quantity/20' ,40' container:100,202sets

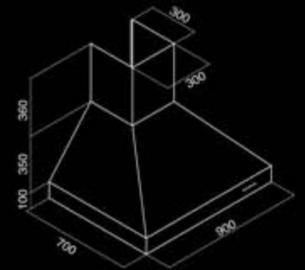

Cooking Profi is specifically designed for outdoor barbeques, with a double sided baffle filter system allowing a greater capture area to remove the air in and around the cooking surface. In addition, it offers a removable grease trap for superior cleaning. The Home Profi is available in any of our metals, and can be manufactured using a super-powerful fan or for use with our normal centrifugal fans. This superb system is available in most of our standard designs as well.

AR-697

COOKING PROFI

voltage:110V ~ 240V/50Hz/60Hz
motor power:175W
lamp:2x20w halogen lights
filter: 4pcs baffle filters
suction capacity:1000m³/hr
outlet diameter:150mm
gw/nw.:36/32kg
packing:940mmX520mmX760mm
quantity/20' ,40' container:60,120sets

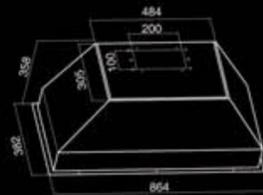

AR-695

HOOD INSERTS

voltage:110V ~ 240V/50Hz/60Hz
motor power:175W
lamp:2x20W halogen lights
filter: 2pcs baffle filters
suction capacity:1000m³/hr
outlet diameter:150mm
gw/nw.:23/20kg
packing:920mmX400mmX450mm
quantity/20' ,40' container:150,303sets

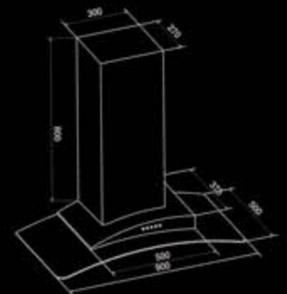

Our **Hood Inserts** are manufactured utilizing our normal fan installed or for use with a powerful fan. Many units are available from stock in over 10 various sizes for wall or ceiling mounted installations. Or, you can have the insert made to your specific requirements.

WALL-MOUNT HOOD

voltage:110V ~ 240V/50Hz/60Hz
rotation method:one motor, two fans
rated motor input power:170W
illumination: ≤ 2 × 20W
rated input power:210W
suction capacity:840 ± 60m³/hr
wind pressure:160Pa
noise: ≤ 65dBA
outlet diameter:150MM
gw/nw.:23/20KG
packing:960MM × 450MM × 580MM
quantity/ 20' 40' container:119,247sets

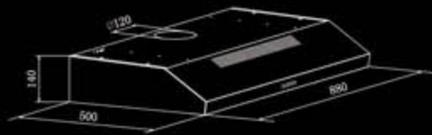

KP0836s / KP0836d

SLIM HOOD

voltage: 110V~240V/50Hz/60Hz
 motor power: 30W
 lamp: 2x25W
 suction capacity: 300m³/hr (double motors: 540 m³/hr)
 outlet diameter: 120mm
 gw/nw.: 11/10kg
 packing: 940mmX180mmX560mm
 quantity/20' ,40' ,40HQ container: 282,587,688sets

optional parts: glass shield
 halogen lights(2x20W)
 3 speed soft touch switch
 35w motor
 charcoal filter

All glass inner door

Many of the ovens included in this brochure feature the all glass inner door, using a flat sheet of glass to eliminate the possibility of food particles collecting in corners, and which can be simply removed for cleaning, even between the glass layers. The construction of the door ensures a lower exterior door surface temperature, making it cool to the touch.

New cooling system

Ovens are equipped with an innovative cooling system for both door and oven. The oven cooling system is designed to minimize heat transfer to protect the kitchen cabinetry by circulating a cool air curtain around the oven.

Light:
Separate light control allows light to be switched on even when the oven is off

Lower Element Only:
This method of cooking uses the lower element to direct heat upward to the food. For slow – cooking recipes or for warming up meals.

Convention Oven: Top Element & Lower Element:
This method of cooking provides traditional cooking with heat from the top and lower elements. Particularly suitable for roasting and baking on one shelf only

Fan & Lower Element:
This method of cooking uses the bottom element only while the fan is circulating the heat. For delicate dishes and heating pre-cooked food. It is also suitable for sterilizing preserving jars.

Convention Oven: Top Element & Fan:
This method of cooking provides traditional cooking with heat from the top and the lower element, plus the use of circulation fan to ensure a fast and even distribution of the heat. Suitable for light and delicate baking such as pastries.

Circular Element With Fan:
This method of cooking uses the circular element while the heat is distributed by the fan, resulting in a faster and more economical operation. Cooking with the fan on allows different kinds of food to be cooked simultaneously on different shelves, preventing the transmission of smells and tastes from one dish onto another.

Full Grill:
This cooking method is normal grilling utilizing the inner and outer part of the top element, which directs heat downwards onto the food. Suitable for grilling medium or large portions of sausages, bacon, steaks, fish, etc.

Defrost:
The fan runs without heat to reduce the defrosting time of frozen foods. The time required to defrost the food will depend on the room temperature, the quantity and type of food. Always check food packaging for instructions.

Fan & Full Grill:
This method of grilling uses the top element in conjunction with the fan, to help a fast circulation of heat. Suitable where quick browning is required and "sealing" the juices in, such as with steaks, hamburgers, some vegetables, etc.

Top Element Only:
This method of cooking uses the outer part of the top element to direct heat downwards onto the food. For gentle cooking, browning or keeping cooked dishes warm.

Half Grill:
This cooking method is normal grilling utilizing the inner part only of the top element, which directs heat downward onto the food. Suitable for grilling small portions of bacon, toast, meat, etc.

Full Grill & Rotisserie:
Please check your model number to establish if the rotisserie accessory is supplied. This function will operate the rotisserie as well as the grill simultaneously giving a moderate to strong heat. Best for whole chickens, poulets, kebabs, speed roasts.
